To structure there is the option of boxes

The main components of the program include:

DESIGN STUDIO: Includes assignments in mathematics & visual art through a wide range of digital and analog methods, paired with lectures from U-M's Taubman College of Architecture and Urban Planning faculty. Education practitioners, policymakers, and researchers concur that architecture in particular is an exemplary project-based learning discipline – one which teaches the practical tools of counting, scaling, debating, and organizing – encouraging students to engage in both high-level thinking and hands-on production. Within a studio-based, college-level work environment, ArcPrep builds on knowledge in mathematics and the visual arts, applying creative methodologies to real-life community endeavors. Through direct engagement, the program delivers design tools that empower, benefiting students who are typically relegated to a privileged few. ArcPrep's current curriculum is broken into five modules:

DESIGN STUDIO: Includes assignments in mathematics & visual art through a wide range of digital and analog methods, paired with lectures from U-M's Taubman College of Architecture and Urban Planning faculty. Education practitioners, policymakers, and researchers concur that architecture in particular is an exemplary project-based learning discipline – one which teaches the practical tools of counting, scaling, debating, and organizing – encouraging students to engage in both high-level thinking and hands-on production. Within a studio-based, college-level work environment, ArcPrep builds on knowledge in mathematics and the visual arts, applying creative methodologies to real-life community endeavors. Through direct engagement, the program delivers design tools that empower, benefiting students who are typically relegated to a privileged few. ArcPrep's current curriculum is broken into five modules:

SELF-EXPRESSION & CREATIVE PRACTICE: Presents a set of rotating topical modules offering students modes of critical analysis to understand the forces that shape the built environment. Exercises encourage students to contemplate and reimagine architecture's part in the construction of an equitable society.

PROFESSIONAL PRACTICE: Connects students with a range of leading professionals invited from the fields of Architecture, Landscape Architecture, Urban Planning and Design, Art, Activism, and Community Advocacy to trace the myriad of professional pathways available through design education.

<p>1. Tool Box</p> <p>The Tool Box module introduces students to the discipline of architecture, inviting them to explore the contemporary analog and digital tools professional designers use to actualize their ideas. 2D & 3D representation techniques are honed through sketching, model making, and the use of software packages including Rhinoceros 3D and the Adobe Creative Suite. Through iterative design exercises, students develop a technical proficiency necessary to complete a sophisticated final project.</p>	<p>4. Technology and the City</p> <p>The goal of the Institutions and Civil Liberties module is to imbue students with a sense of agency to critique the harmful institutions that structure the world around them, envision alternative futures, and put those visions into practice. It will also instruct students about how people who have been directly impacted by the carceral system have marshaled creative expression to critique that system and put forth their own visions for their communities. The module is structured around three creative modalities: writing, visual art, and community building. Each section of the module introduces students to individuals and activists who have used that modality and provides students with opportunities to practice that modality themselves.</p>
<p>2. Food, Culture, and Access</p> <p>The Food, Culture, and Access module introduces students to the concept of spatial justice in relation to food as a right, a material of cultural expression and a component of a broader urban network, touching on the social, economic, and environmental implications of food systems. Through a series of lectures, presentations and workshops, the module will address current topics around food insecurity/equity and explore ways architecture and design can serve to make positive change.</p>	<p>5. Building Society: Applied Final Project</p> <p>Each year, ArcPrep selects an institution for students to reimagine. The branch library has been tabbed this academic year, as the library system in Detroit finds itself under unprecedented burden and pressure. Only six of 21 branches are slated to reopen in the Fall of 2021, after funding shortfalls, accentuated by the challenges of an ongoing pandemic, have strained a beloved civic institution. Students will be asked to consider the future of branch libraries – their alterations, sustainability, social obligations, and civic role both in Detroit and more broadly.</p>
<p>3. Institutions and Civil Liberties</p> <p>The goal of the Institutions and Civil Liberties module is to imbue</p>

"Augmented Tactonica" students Gabrielle Porter, Richard Hsu, and Jirayut Puritthai use immersive virtual reality tools to evaluate the flow of people.

Left: Quote in use, Links with Arrows, If there is a link in text is underlined

My favorite part was the people. The friends I met, the Studio Instructors, and the Residential Counselors were all wonderful. The Studio Instructors and RCs were all very informative regarding both architecture and just college in general.

↳ Always Name Here, Position

We wanted it to have a 'bodega' feel," Sirota says. You can just sort of pop into a bodega and get a initialy was that you can pop into the TVLab and that other people are up to. Technology can be e something that seems like you need years of access. So we were very interested in creating welcome people across the gamut of expertise.

Rubrics, always as short as possible

Arcprep Awards

Academic Achievement Award	Academic Improvement Award	Studio Award	Academic Achievement Award	Cornell Future Architecture Award University of Michigan + Cornell University Joint Initiative	Rossetti Internship Program University of Michigan + Rossetti Joint Initiative
The Academic Achievement Award is granted to up to five students per semester who have exhibited exemplary maturity and work ethic contributed to an intellectual and collegial environment and shown independent and innovative thinking in the execution of project assignments and public presentations.	The Academic Achievement Award is granted to up to five students per semester who have exhibited exemplary maturity and work ethic contributed to an intellectual and collegial environment and shown independent and innovative thinking in the execution of project assignments and public presentations.	The Academic Achievement Award is granted to up to five students per semester who have exhibited exemplary maturity and work ethic contributed to an intellectual and collegial environment and shown independent and innovative thinking in the execution of project assignments and public presentations.	Multiple scholarships will be awarded to high-achieving students to attend ArcBart, a three-week-long residential program for high school students that offers students the opportunity to explore the built environment firsthand through an introduction to architectural design. Participants will experience the rewarding intensity of an engaging college architecture studio, partake in skill-building workshops that reinforce analytical and conceptual problem-solving skills, and visit architecturally significant projects in Southeast Michigan.	Michigan Architecture Prep and Cornell University's Department of Architecture offers the Cornell Future Architecture Award to students who have shown an interest in and talent for design and architecture. Awardees will attend the Cornell Introduction to Architecture Program – a six-week architecture enrichment program at Cornell University in Ithaca, New York – at no cost. Each year, ArcPrep graduates accepted into this program receive a full tuition, room, and board scholarship covering all expenses related to the program. Fokus Areas in Master of Urban and regional Planning

Urban Design

The Master of Urban Regional Planning program's flexible curriculum provides students the opportunity to explore a wide range of topics in the field of urban and regional planning or gain depth in a specific area. The focus areas described below provide guidance about elective courses a student could take to more fully explore that topic. Focus areas are structured to be potential courses of study, and are not a requirement for the Master of Urban Regional Planning degree.

Courses listed as "Primary Courses" provide a majority of the material directed toward the focus area. "Secondary Courses" provide a smaller share of course material on the focus area, and "Non-URP courses" are offered in other units on campus.

Program Overview

- APPLIED PLANNING SKILLS FOCUS AREA**
- Community And Economic Development**
- Global And Comparative Planning**
- Housing And Equitable Development**
- Land Use And Environmental Planning**
- Physical Planning And Design**
- Social Justice And Urban Development**
- Sustainability, Resilience, Adaptation, And Climate Change**

Master of Urban and Regional Planning

Urban Design

A top program for urban and regional planning graduates programs by Taubman, our Master of Urban and Regional Planning (MURP) degree prepares students to become leaders who plan for and engage with communities for the greater good. Graduates apply their knowledge and technical skills in a wide variety of settings, from private business to social impact non-profit organizations to public sector agencies at all levels.

Apply To Taubman College

The Taubman College Fabrication and Robotics Lab (FABRLab) supports research and teaching activities in digital fabrication, robotic construction, and physical making across a wide range of materials and processes. It is recognized as one of the premier facilities among academic institutions worldwide. The FABRLab provides students and faculty at Taubman College with extensive access to industrial machinery and the expertise to apply it to real-world architecture and building construction challenges. The FABRLab works with faculty and students on cutting-edge techniques which have the potential to transform practice in the fields of architecture, engineering, and construction. These efforts have resulted in the development of multiple novel fabrication processes, numerous patents, and an extensive number of built projects and publications.

Architecture Dual Degree
 M.Arch + M.U.R.P.
 M.Arch + Urban Design
 M.Arch + M.S.D.M.T.
 M.Arch + M.B.A.
 M.Arch + M.Eng
 M.U.D. + M.U.R.P.

Architecture Dual Degree Options
 M.U.R.P. + M.Arch
 M.U.R.P. + M.U.D.
 M.U.R.P. + M.B.A.
 M.U.R.P. + J.D.
 M.U.R.P. + Seas

Student Initiated Dual Degrees
 M.U.R.P. + Landscape Arch
 M.U.R.P. + Public Health
 M.U.R.P. + Public Policy
 M.U.R.P. + Information Science
 M.U.R.P. + Social Work

Taubman College Architecture and Urban Technology

Apply To The B.S. In Architecture (Cross Campus Transfers)

The Taubman College Fabrication and Robotics Lab (FABRLab) supports research and teaching activities in digital fabrication, robotic construction, and physical making across a wide range of materials and processes. It is recognized as one of the premier facilities among academic institutions worldwide. The FABRLab provides students and faculty at Taubman College with extensive access to industrial machinery and the expertise to apply it to real-world architecture and building construction challenges. The Lab conducts fundamental and applied research with numerous industry partners and national funding institutions. The FABRLab works with faculty and students on cutting-edge techniques which have the potential to transform practice in the fields of architecture, engineering, and construction. These efforts have resulted in the development of multiple novel fabrication processes, numerous patents, and an extensive number of built projects and publications.

Prerequisites

Prerequisite	Term
1. Application Open	2-4
2. Minut Craft, Craft Lab - Meeting @ 110 112 1000	February 11, 2024
3. Application Closed	February 28, 2024
4. Academic Notification sent to Student	April 1, 2024
5. \$500 Deposit Due	April 15, 2024
6. Naming Letter Submit Due	April 15, 2024
7. Withdrawal/Admission Notification	May - June 2024
8. Rollout 2024

Taubman College Architecture and Urban Technology

The Laboratories: The Taubman Visualization Lab (Tvlab)

The Taubman Visualization Lab (TVLab) is a flexible, collaborative, accessible space equipped with a broad range of External Reality (XR) technologies, including augmented and virtual reality, 3D scanning and spatial mapping equipment, computational devices, and more. Designed to accommodate everyone from expert to novice, the TVLab offers virtual production and capture technology resources, including video cameras, 360 cameras, drones, and projectors. The state-of-the-art robotic arm combines laser eye technology with arming fabrication.

Students Groups

From annual journals, periodic papers, and occasional special books, publications at Taubman College serve as a lasting record of the work, activities, and conversations at the college.

- AGORA**
Agora Journal of Urban Planning and Design is an award-winning, student-run, peer-reviewed publication published annually by students in the urban and regional planning, urban design, and real estate certificate programs. Agora explores topics of urbanism, design, planning practice, and policy evaluation through a wide variety of perspectives and media, including student work from a wide range of disciplines. The journal provides an opportunity for campus community members to share perspectives on various urban issues, including those that affect the region, the state, and the planet.
- DIMENSIONS**
Education practitioners, policymakers, and researchers concur that architecture in particular is an exemplary project-based learning discipline - one which teaches the practical tools of counting, scaling, detailing, and organizing - encouraging students to engage in both high-level thinking and hands-on production. Within a studio-based, college-level work environment, ACPrep builds on knowledge in mathematics and the visual arts, applying creative methodologies to real community endusers. Through direct engagement, the program delivers design tools that empower, benefiting students who are typically relegated to a privileged few. ACPrep's current curriculum is broken into five modules.
- AMERICAN INSTITUTE OF ARCHITECTURE STUDENTS (AIAS)**
Education practitioners, policymakers, and researchers concur that architecture in particular is an exemplary project-based learning discipline - one which teaches the practical tools of counting, scaling, detailing, and organizing - encouraging students to engage in both high-level thinking and hands-on production. Courses

- THE NEW YORK**
This course is designed to provide students with a comprehensive understanding of the history and theory of architecture. It covers the evolution of architectural styles from ancient times to the present day, with a focus on the work of influential architects and the impact of social and cultural changes on the built environment.
- REFUGEE READY REGION (RRR)**
This course focuses on the design and construction of a refugee-ready region, addressing the unique challenges and needs of a diverse and growing population. It explores the integration of sustainable design, community engagement, and social equity into the planning and development process.
- AMERICAN INSTITUTE OF ARCHITECTURE STUDENTS (AIAS)**
This course provides a platform for students to engage in research and advocacy related to the American Institute of Architecture Students (AIAS). It examines the role of student organizations in promoting architectural education and addressing the needs of the profession.

Good to know

- Planning/Design**
The planning and design process is a complex and iterative one, involving a wide range of stakeholders and disciplines. It requires a deep understanding of the context and a collaborative approach to problem-solving.
- Building/Construction**
The building and construction process is a highly technical and regulated one, involving a wide range of stakeholders and disciplines. It requires a deep understanding of the building code and a collaborative approach to problem-solving.
- Language and the Built World**
Language plays a crucial role in the built world, shaping the way we think about and interact with our environment. It is a powerful tool for communication and a key element of cultural identity.
- UNIVERSITY OF MICHIGAN**
The University of Michigan is a leading institution of higher learning, known for its commitment to academic excellence and its diverse student body. It provides a rich and challenging environment for students to learn and grow.

Visits and Events

Information sessions and tours are held throughout the year, providing a chance for prospective students to learn more about the college and its programs. These events are held in a variety of formats, including in-person, virtual, and hybrid.
